

Checkweigher and Metal Detection
Management Information System

InLine QC PRO automatically captures production and trading standards data generated by in-line checkweighing and metal detection equipment.

Its unique design provides the ability to capture data from all makes and models of checkweigher. On many current installations data is collected from multiple checkweighers (for example, Loma, Yamato, Wardbekker, Cintex and Ishida) to produce seamless management reports.

The Issues....

- In today's fast moving business environment information is power.
- Failure to access information quickly and provide a response leads to a perception that a poor quality of service is being offered.
- More and more companies are now beginning to see the limitations with paper documents and are looking for a better solution.
- Not only do they require a system to record their information, they also need a system that will analyse their data and highlight any critical quality parameters that are drifting from the

More and more Food and Beverage companies are turning to InLine QC PRO to solve their problems....

- InLine QC PRO has been designed and developed to meet Trading Standards, Customs and Excise, FDA and MCA standards
- InLine QC PRO reports Production Performance, and Trading Standards information while the lines are running.
- InLine QC PRO permits data to be presented in a variety of tabular and graphical forms and sorted and searched in many different ways, including:

- Current Production
- % overfill
- Overfill costing
- Average weight control
- Batch performance
- Shift performance
- Historical analysis
- Metal detection analysis
- Down-time analysis
- Line efficiency analysis

- InLine QC PRO stores a copy of the original checkweigher report, filed against the line number.
- InLine QC PRO is an easy to use Windows™ based system that requires no operator intervention, eliminating the need for manual collection and storage of checkweigher data.

Give-Away, Line Performance and Trading Standards data direct from your desktop

A cost-effective solution for the Food and Beverage Industry

ICCS has been writing quality control software since the early 1980s. With over 100 satisfied customers, ICCS is proud of the fact that InLine QC PRO has helped many companies (small and large) to safeguard their operations to the benefit of all concerned.

Some of ICCS' customers include...

West Yorkshire Trading Standards Service

ICCS is the author of the software used by Trading Standards

ICCS is the recognised leader in providing quality assurance and control systems, for high speed, process-packaging operations.

InLine QC PRO provides the correct level of information, instantly and accurately.

ICCS take care of the whole project – design, project management, installation, training and support.
